EDUCATION

Mahindra University <i>Bachelor of Technology in Artificial Intelligence</i>	August 2023 – Present GPA: 8.4/10
Sri Chaitanya College, Andhra Pradesh <i>Intermediate</i>	March 2023 93.1%
Chaitanya High School (BIEAP), Tirupati <i>10th Grade</i>	June 2021 99.16%

RELEVANT COURSEWORK

Machine Learning | Deep Learning | Computer Vision | Natural Language Processing | GenAI & LLM | Data Structures & Algorithms | Database Management Systems | Software Engineering

SKILLS

Languages: Python, JavaScript, Java, C, HTML5/CSS
ML/DL Frameworks: PyTorch, scikit-learn, FastAPI
CV & Data: NumPy, pandas, Matplotlib, OpenCV, scanpy/anndata
Concepts: Object Detection, Semantic Segmentation, Feature Extraction, CNN Architectures, 3D Reconstruction
Tools: Git/GitHub, Google Colab, VS Code, Jupyter Notebooks
Web: React, Node.js

PROJECTS

Cell Interaction Prediction <i>Python, PyTorch, NumPy, pandas, scanpy</i>	Feb 2026 – May 2026
- Built an end-to-end ANN → CNN pipeline for cell-cell interaction prediction from scRNA-seq gene expression data, taking the system from experimentation to a stable, evaluated pipeline. - Benchmarked six CNN architectures for feature extraction and classification (LeNet, AlexNet, VGGNet, ZFNet, GoogLeNet, ResNet); ZFNet achieved best F1 (0.758), ResNet highest recall (0.867). - Preprocessed large-scale scRNA-seq data per CellPhoneDB v2.0 protocol — top 200 highly variable genes, up to 3,000 cells per run; managed full end-to-end ownership of data pipeline and evaluation.	
Hybrid Predictive Maintenance <i>Python, NumPy, pandas, K-Means, GNUplot</i>	Mar 2025 – May 2025
- K-Means clustering on NASA CMAPSS dataset to identify engine degradation stages. - Built classification and regression models from scratch without ML libraries; manual feature scaling and evaluation - Visualized degradation patterns with GNUplot; analyzed RUL trends across engine cycles.	
Privacy Policy Grader <i>Flask, Gemini API, NLTK, BeautifulSoup4, JS, HTML5 Canvas</i>	Mar 2026 – May 2026
- AI-powered web app that scrapes, analyses, and scores privacy policies across 5 weighted dimensions using a custom NLP pipeline (18+ metrics) and Gemini 1.5 Flash. - Engineered zero-dependency frontend: animated grade arc and 5-axis radar chart built entirely with the HTML5 Canvas API, no Chart.js or D3. - Built hallucination guard using difflib fuzzy-match to verify every LLM-generated claim against source policy text.	

AWARDS

Secured 1st place in Web development at 418 Hackathon	2026
University Merit Scholarship for academic excellence of 1L (awarded 3 times)	2023 – Present

EXPERIENCE

Learning Space Foundation <i>Website Developer</i>	Hyderabad, India July 2025 – Jan 2026
- Designed and developed a complete multi-page website for a non-profit using WordPress and Elementor with responsive layouts, consistent branding, and accessibility compliance. - Customized components with HTML5 and CSS3 ensuring cross-device compatibility.	

HOBBIES

Cricket, UI/UX Design
